SMOKE GREEN

Consider, for a moment, a lush expanse of deep green colour and feel its immediate connection to nature. Now picture that area with a low-level mist hovering over the surface. Such is the beauty and intrigue of Smoke Green.

The very low chroma of Smoke Green's yellow-influenced hue imbues it with a sense of quiet luxury, while the deep value adds a note of sincerity. Indeed, it is a colour that can evoke a feeling of bonding with nature; especially the earth's broad stretches of fields, bogs, and country sides.

Ecologically inspired as it is, Smoke Green is a beautiful colour to create a grounded, effortless effect within any designed space. As a new type of neutral, it coordinates effortlessly with many wood tones, from light to dark, and many different colours. Reflecting its earthly inspiration, it has the flexibility to enhance large commercial spaces, or feel intimate in residential settings.

A garden of earthly delights emerges when Smoke Green is coordinated with the lush hue of *Purple Horizon*, the rich golden *Toffee*, and the sparkle of *Treasure*. The combination conjures a deep, lush botanical world that feels indulgent and suggests nature at its most majestic. Complete the look with the dark wood aesthetic of *ME Noce Lucca Natural Synchro* for an environment that is grounded, with a sumptuous edge.

Though a deep and rich colour, a transcendent mood can be crafted when combining Smoke Green with the soft beige of *Nova Light Cashmere* and the lightness of *Airy Blue*. The ethereal atmosphere begins with the green's misty appeal, and with the other hues suggests the ideal of clean air and soft earth. Coordinating it all with *Vincenza Oak Classic* completes a look that feels light as air, but with a grounded element that maintains a sense of peace.

Smoke Green embodies the best of nature's colours. It appears connecting, feels comforting, and offers an engaging colour with which to create interior spaces.
