

TECHNICAL DATA SHEET

RENOLIT MULTIFUNCTIONAL ROLL HOLDER - Type 81360001, 81360002 and 81360003

Application:

The 81360 Multifunctional Roll holder has been developed as both a transport system and a workbench, on which a user can handle, mark and carry out all kinds of cuts on the roll.

Description:

It consists of three references:

1. **Reference 81360001.** Set of handlebars and wheels with side covers outside the roll.

2. **Reference 81360002.** Multifunctional long axis measuring 2410 mm in length that can transport both types of RENOLIT ALKORPLAN reinforced sheet rolls (2.05 m and 1.65 m). On this axis, the 1.65 m roll can be transported either centred or off-centre, loading more weight on the wheels. This is more advisable if someone is transporting it by themselves.

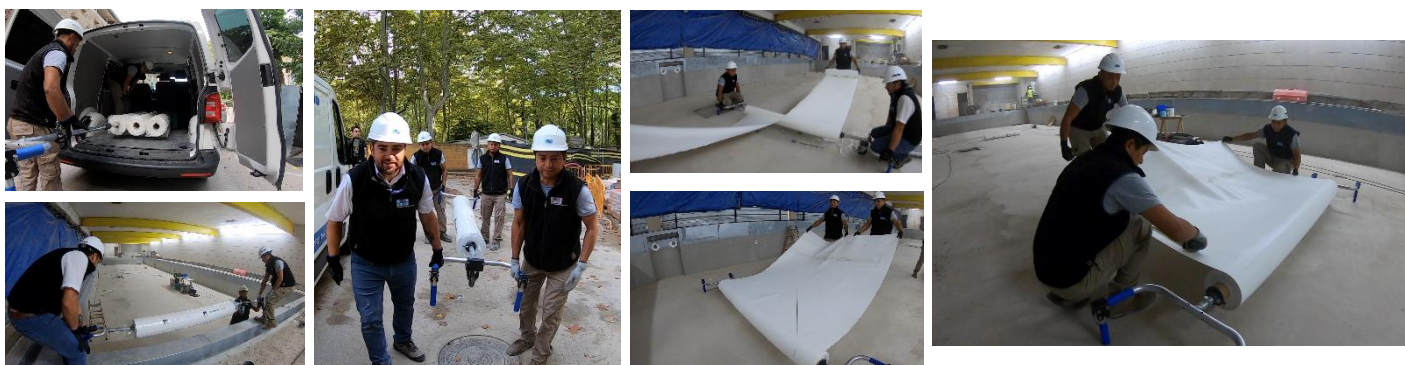

3. **Reference 81360003.** 1840 mm short axis, only suitable for the 1.65 m roll. This measurement is the most common in a private swimming pool. The size of this axis helps it fit seamlessly into small combi vans.

Reference	81360001	81360002	81360003
Description	Handlebar and wheel set	Central axis for 2.05 m and 1.65 m rolls	Central axis for 1.65 m rolls
Technical features			
Material	AISI 304L Stainless Steel	AISI 304L Stainless Steel	AISI 304L Stainless Steel
Physical features			
Length		2410 mm	1840 mm
Material thickness	1.5 mm	2 mm	2 mm
Tubes diameter	25 mm	30 mm	30 mm
Weight	6 kg	2.5 kg	1.5 kg
Benefits			
It makes it easier to load and unload the rolls from the authorized vehicles.			
It simplifies the transport of the roll in flights of stairs, narrow corridors and especially in the descent of the roll to the bottom of the vessel.			
It becomes a workbench once set up, making unwinding, marking and cutting operations easier.			
It is especially effective in public swimming pool installations as a rotational axis for cutting different pieces.			
It avoids damage, stains or marks to the rolls when they are handled on pool's bottom.
