**RENOLIT EXOFOL.
THE INDUSTRIAL STYLE.**

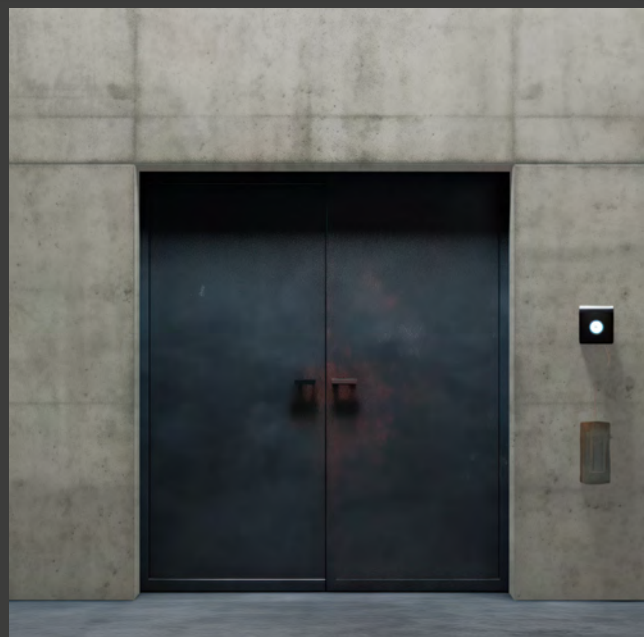

Imagine the possibilities.

RENOLIT EXOFOL PX Urban Spirit 1.

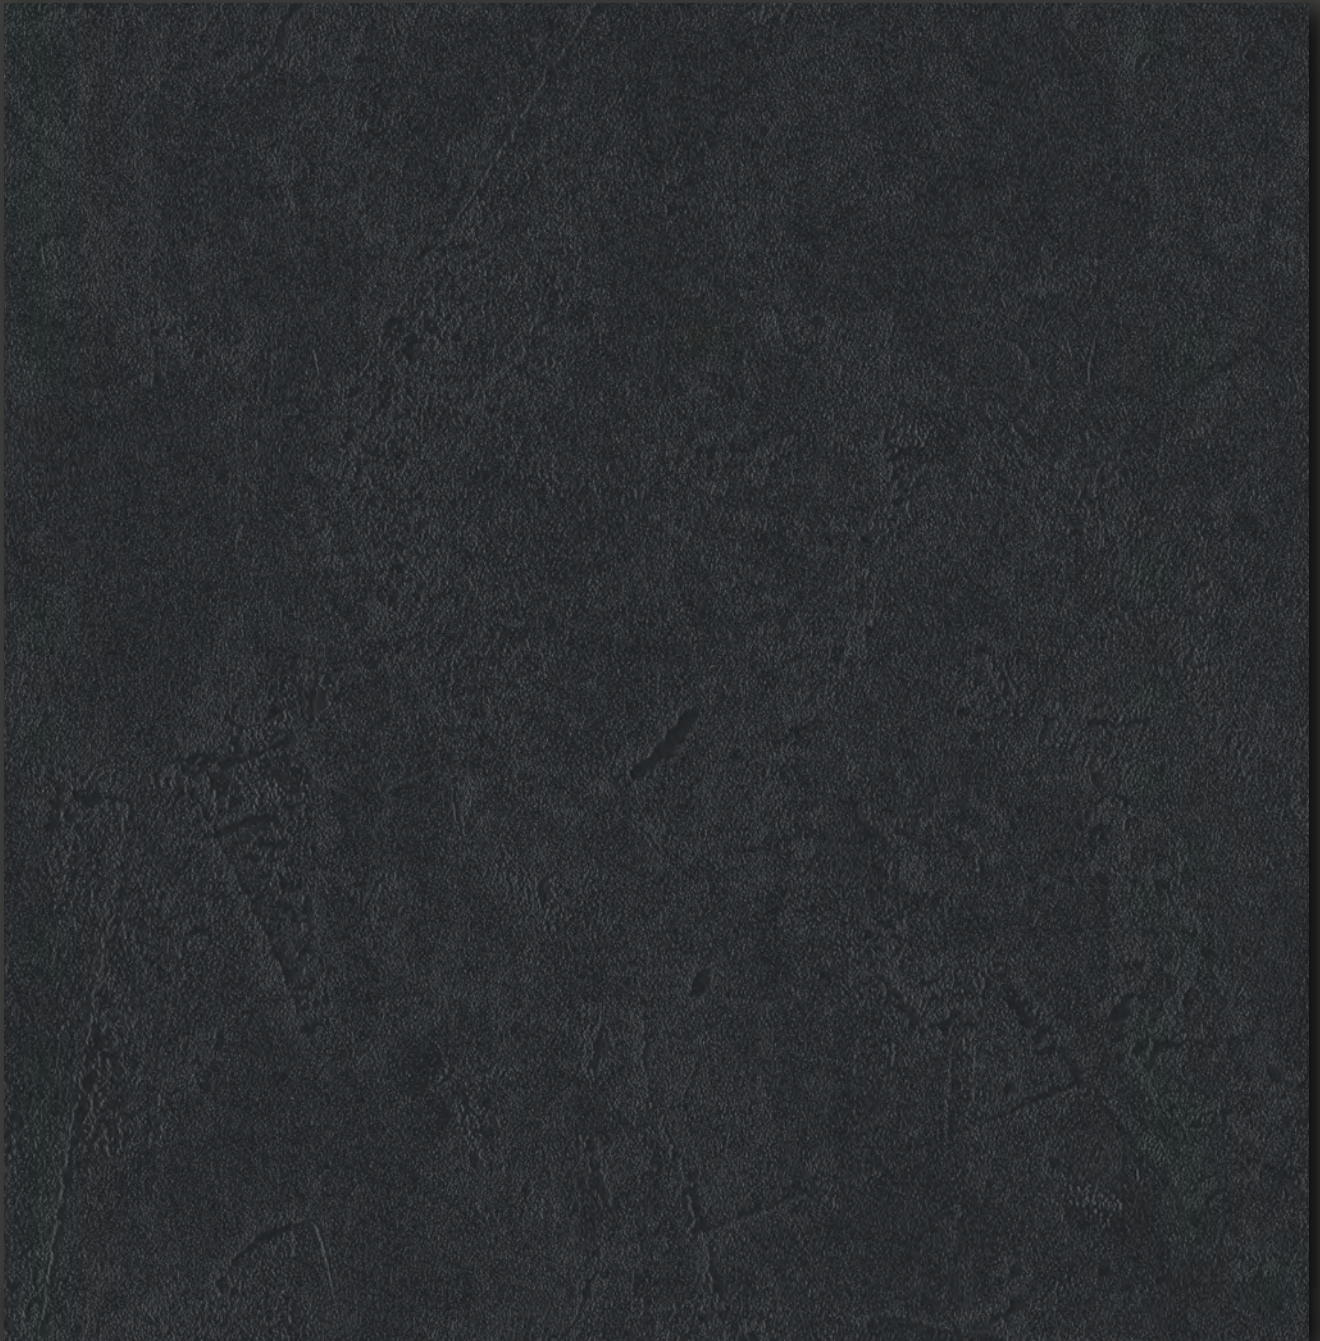

A load-bearing building material for modern buildings has evolved from the depths of the planet: concrete. The mineral resources sand and gravel form a durable bond with cement. Cool and unapproachable in appearance, concrete stands for solidity in urban architecture. **RENOLIT EXOFOL PX Urban Spirit** transfers this metropolitan flair to the construction components.

RENOLIT EXOFOL PX Aged Copper.

An interplay of gold and green colours, combined in one decor: RENOLIT EXOFOL PX Aged Copper. The greenish patina that forms on copper over time carries the history of days gone by as well as the durability of this metal. This warm, earthy colour adds a rustic elegance to building components.

RENOLIT EXOFOL PX Anthracite Grey 7016 Matt Stone.

A symbol of volcanic rock, the cold echo of the fiery power of the earth's interior, is symbolised in RENOLIT EXOFOL PX Anthracite Grey Matt Stone. Inspired by the timelessness and hardness of stone, the decor adds a special appearance to buildings and creates a striking contrast with its matt grey tones.

RENOLIT EXOFOL PX Corten Steel.

Iron and copper are the all-rounders of the earth's treasures. Iron as a fundamental technical element protects itself with a copper-coloured layer of rust as it ages. And copper cables or pipes run through our environment like veins in our bodies - hidden from the outside world. RENOLIT EXOFOL PX CortenSteel exposes the rusty copper colours.

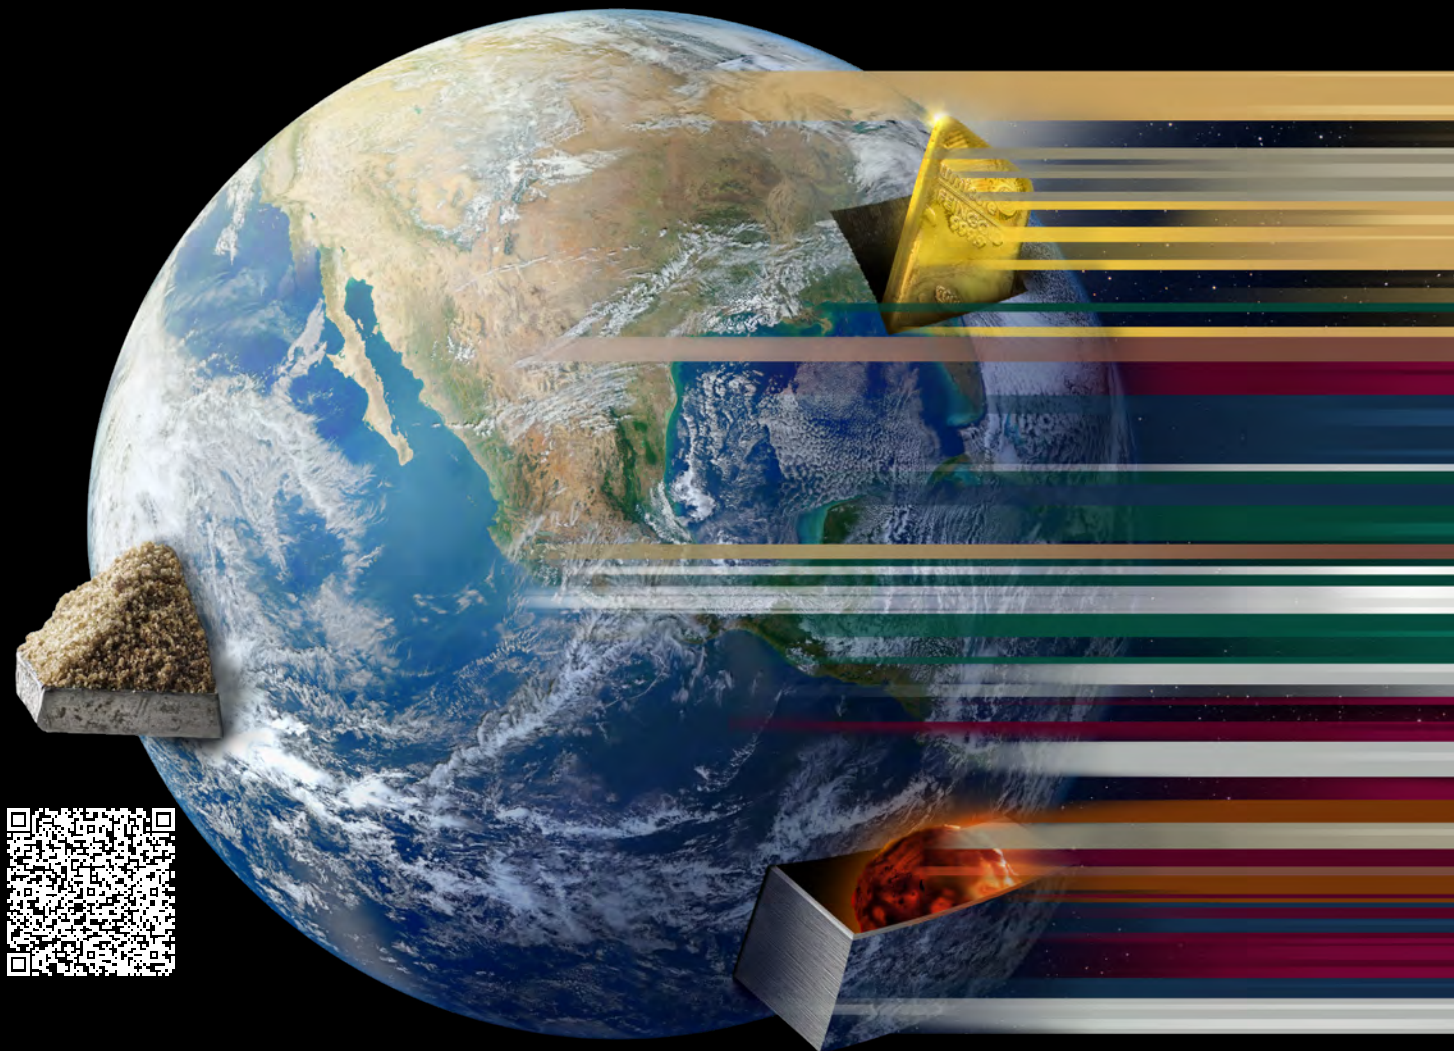

Nature meets zeitgeist – a journey through the treasure chests of the world

A deep look into nature reveals a hidden harmony that connects the earth and the universe. In the dark depths of our world lie precious treasures that we do not always recognise as such: Silent witnesses of times past, hidden guardians of our history, sources of infinite inspiration.

The Colour Road 24/25 Trends-service invites us to pay special attention to our natural resources under the motto "Treasures of our planet". With proven expertise and flair, it translates aspects such as temporal development, social dynamics and application requirements into specific colour ideas for outdoor areas. Decors inspired by precious metals such as "Corten Steel" and "Aged Copper" provide shining highlights, while the stone decors "Urban Spirit" and "Anthracite Grey Matt Stone" stand for stability and reliability.

This journey through the earth's treasures opens our senses – and reminds us that we are part of an infinite wonder that needs to be protected and honoured.
