

The classic
exterior film.

Unique variety, proven quality.
RENOLIT EXOFOL MX.

Rely on it.

RENOLIT EXOFOL MX. **State of the art technology.**

When thinking of decorative surfaces on window profiles and entrance doors, no doubt you'll be thinking of the classic: RENOLIT EXOFOL MX.

For 30 years, this high-performance exterior film has stood for captivating colours, woodgrains and surface textures, which embellish any exterior surface.

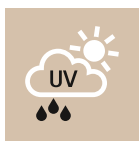

RENOLIT EXOFOL MT was developed especially for lamination to vacuum formable door infill panels, and matches the appearance of RENOLIT EXOFOL MX.

Why settle for anything less than the widest choice?

RENOLIT EXOFOL MX gives profiles individuality. The classic high-performance film stands for reliable high quality with the widest range of colours, woodgrains and textured surfaces.

The stock range includes more than 50 films. Our wide collection of decorative films and design options for exterior applications is unrivalled.

RENOLIT EXOFOL MX films have an aesthetic appeal yet are very easy to maintain. Annual cleaning with detergent, water and a sponge or soft brush, is all you need to maintain the visual appearance throughout the life of the product.

UV and weather resistant

Variety of décors

Colour fast pigments

Easy to clean

Solar Shield Technology (SST).

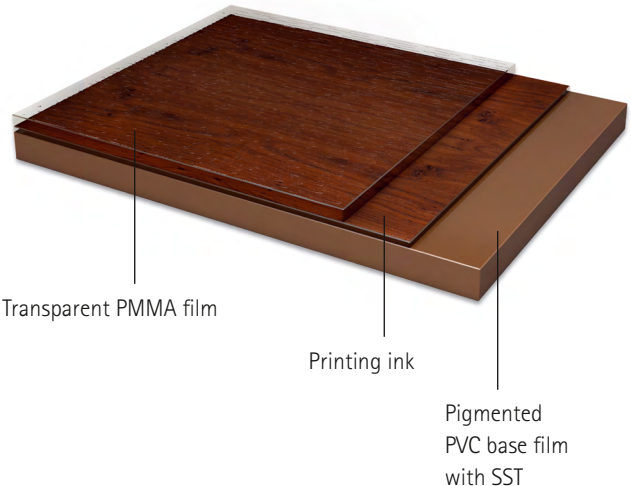

Because lasting beauty needs protecting.

SST slows down the aging process of the film and building component. Profiles remain dimensionally stable and windows stay airtight for longer, improving energy efficiency.

SST is the most effective form of solar protection. Pigments in the coloured base film reflect the sun's infrared radiation significantly reducing heat build-up in the profile. The result: greater safety due to cooler profiles.

The transparent upper layer of RENOLIT EXOFOL MX consists of polymethylmethacrylate (PMMA) which absorbs more than 95% of the UV radiation, giving woodgrains and solid colours long-lasting protection against fading and other effects of weathering.
