- Resistant to UV exposure, preserving color accuracy for lasting perfection.
- Exceptional shrink resistance and 3D formability.
- Ideal for long-term applications such as point-of-sale and out-of-home installations, and vehicle wrapping.

# RENOLIT PRINT EX

## Differentiation through EXcellence

Rely on it.

What makes our alternative to standard vinyl excellent? **RENOLIT PRINT EX** builds upon the company's expertise in PVC films, offering now an addition to its existing film range, that leaves no compromise on the performance, quality and durability while meeting rigorous standards for various long-term applications at the point of sale. With our newest development you will experience enhanced versatility and vibrant visuals that leave a lasting impression, coupled with ease and efficiency in your workflow.

Find out how you can exceed the expectations of leading brands with **RENOLIT PRINT EX**:

### Alternative to standard vinyl

Exceed the expectations of leading brands with **RENOLIT PRINT EX**, a compelling alternative to traditional vinyl. This film meets rigorous standards for long-term applications at the point of sale, offering unmatched performance and reliability.

### Excellent printability

Bring your customers' designs to life with vibrant, true-to-life colors and unparalleled clarity. **RENOLIT PRINT EX** offers seamless compatibility with all printers, eliminating the need for primer or topcoat, and saving valuable time and money. This versatile solution ensures a flawless finish with exceptional gloss, allowing brand messages to stand out in every application.

### Ideal for long-term use

Say farewell to frequent replacements. **RENOLIT PRINT EX** is engineered to last for more than 10 years, ensuring visuals stay vibrant and impactful over time. With exceptional UV stability and resistance to yellowing, it withstands the harshest outdoor conditions, providing a reliable solution for lasting performance.

### Exceptional versatility

Our **RENOLIT PRINT EX** film stands out for its low shrinkage, which prevents deformation and ensures the film maintains its functionality. Its remarkable adaptability to complex surfaces makes it an indispensable choice for branding and fleet wrapping.

**RENOLIT Visual Communication** is specialized in the production of calendered films for over 75 years. Our products are used worldwide for self-adhesive applications in industries such as advertising, automotive and many others. We work closely with our customers in research, development and innovation to deliver novel, high-quality and attractive film solutions. By focusing on continuous development of our industrial films we make a significant contribution to our customers' success in their markets.
